## **DETAILED ACTION**

### ***Amendment***

The amendment filed on 27 February 2009 has been entered into this application.

### ***Allowable Subject Matter***

Claims 1-3 and 5-19 are allowed.

As to claim 1, the prior arts of record, taken alone or in combination, fails to disclose or render obvious annealing a semiconductor structure to diffuse contaminants from a surface particulate into the semiconductor material and after annealing the semiconductor structure, exposing the surface of the semiconductor structure in the vicinity of a surface particulate to at least one high- intensity beam of light from a suitable light source, in combination with the rest of the limitations of the claim. Claims 2-3 and 5 are allowable by virtue of their dependency.

As to claim 6, the prior art of record, taken alone or in combination, fails to disclose or render obvious exposing the surface of the semiconductor structure in the vicinity of a surface particulate to at least one high-intensity beam of light from a suitable light source; and a heating step to the semiconductor to diffuse contaminant from the particle into the semiconductor material, in combination with the rest of the limitations of the claim. Claims 7-13 are allowable by virtue of their dependency.

As to claim 14, the prior art of record, taken alone or in combination, fails to disclose or render obvious means to heat the sample under test associated with the support to diffuse contamination from a particulate into a semiconductor structure of the

sample under test; a high intensity light source; and means to focus a high intensity beam of light from the light source onto a surface of a semiconductor sample under test on the support, in combination with the rest of the limitations of the claim. Claim 15 is allowable by virtue of its dependency.

As to claim 16, the prior art of record, taken alone or in combination, fails to disclose or render obvious a high intensity light source; means to focus a high intensity beam of light from the light source onto a surface of a semiconductor sample under test on the support; heating means to heat the sample in situ, allowing a photoluminescence response to be measured before and after heating, in combination with the rest of the limitations of the claim. Claims 17-19 are allowable by virtue of their dependency.

The reference of Higgs (2004/0106217 A1) discloses illuminating the wafer with a laser to produce photoluminescence (PL) images. However Higgs fail to disclose, teach or suggest annealing a semiconductor structure to diffuse contaminants from a surface particulate into the semiconductor material and after annealing the semiconductor structure, exposing the surface of the semiconductor structure in the vicinity of a surface particulate to at least one high- intensity beam of light from a suitable light source.

### ***Response to Arguments***

Applicant's arguments/remarks, see pages 1-5, filed on 27 February 2009, with respect to the rejection(s) of claim(s) 1-3 and 5-19 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
